

# Horizon School Division Mileage Chart (as of April, 2015)

(mileage stated is one way)

The distances in the chart below are intended to represent the most direct and likely route taken between two locations.

In general, routes involving more paved roads are charted below, but if a gravel route saved 20 km or more, the gravel route is represented.

This chart is intended to add ease in calculating and confirming mileage claims. Distances claimed may differ from that on the chart below should a shorter route between locations have been chosen or a longer route between locations have been necessary. If claiming distances greater than that listed in this chart, please provide an explanation on your claim form for consideration.

*Please report any errors found on this chart to Brian Grest (brian.grest@hzsd.ca).*
